ANALYSIS DATE

June 1, 2026

EST. EFFORT

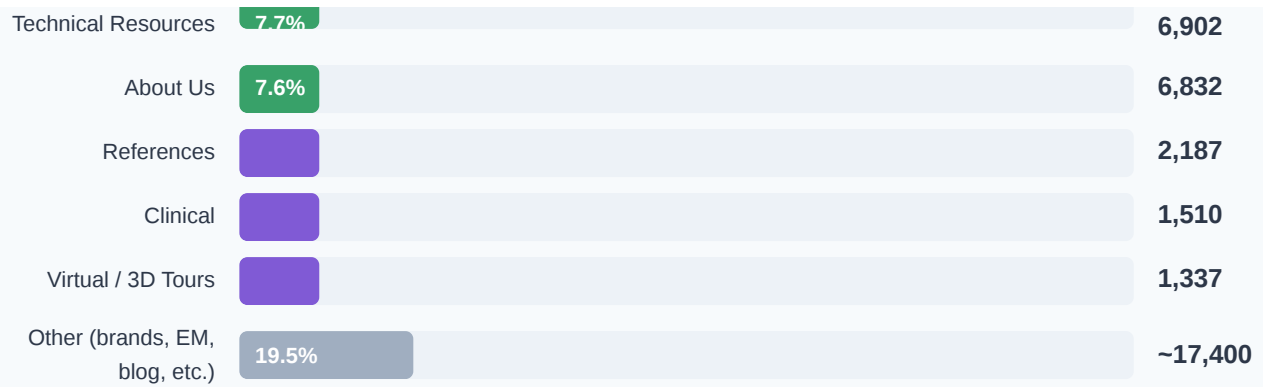

70-99 days

1. URL Inventory & Distribution

Analysis of 89,355 URLs reveals clear content groupings. After excluding non-content pages (thank-you, cart modals, test pages, duplicates), approximately 61,500 unique content pages remain for migration.

Content Distribution by Section

Excluded Pages (Not Requiring Migration)

CATEGORY	COUNT	REASON
Thank-you / Confirmation pages	11,971	Simple utility — single reusable template
Cart modal overlays	2,735	E-commerce UI components, not content pages
Test / Staging pages	6,984	Non-production content
Duplicate sections (promotions1/2, brands1/2, etc.)	11,451	Copies of primary content trees
Total Excluded	33,141	

Platform Migrations Already Completed

CONTENT TYPE	MIGRATED TO	PAGES	STATUS
Blog	WordPress (thermofisher.com/blog/)	~643	Migrated
Press Releases	Q4 Inc (newsroom.thermofisher.com)	~1,574	Migrated
Forms (global/forms/)	Decommissioned	~18,763	404
Contact / Support	React app (store/v2/contact-us)	—	Redirect

2. Page Templates Identified

15 distinct page template types identified through URL pattern analysis and live page investigation.

#	TEMPLATE NAME	EST. PAGES	DESCRIPTION	UNIQUE ELEMENTS
1	Product Category Landing	~12,500	Hub pages with hero + sticky nav + card grid + left sidebar	Sticky anchor nav, left sidebar
2	Product Sub-Category / Topic	~20,000	Deep content: text+image columns, resources, video	Columns-product pattern
3	Promotional Landing	~13,418	Campaign pages: hero + offer cards + CTAs + modals	Promo modal, cart-modal
4	Event Page	~4,919	Event hero + agenda accordion + speakers + registration	Accordion (schedule/tracks)
5	Learning Center / Article	~2,300	Long-form article with sidebar nav + sticky CTA	Sticky CTA, sidebar nav
6	Technical Resource / App Note	~1,900	Document-style with download CTA + related resources	Download block
7	Protocol / Handbook	~1,030	Step-by-step procedures with numbered steps + tables	Step-list block
8	Virtual / 3D Tour	~1,337	Chromeless page wrapping Kaon Interactive 3D iframe	Full-screen embed, no chrome
9	Corporate (About Us)	~200	Mission, leadership grid, brand showcase, CSR highlights	Leadership, brands, mission blocks
10	Brand Microsite	~530	Brand-specific hub: brand hero + product categories	Brand-specific nav

#	TEMPLATE NAME	EST. PAGES	DESCRIPTION	UNIQUE ELEMENTS
11	Cell Line Database	~620	Structured data: properties table + media + ordering	Cell-line-table block
12	Services Directory	~630	Service listing: category cards + CTA banners	Cards-category
13	Blog Post	~640	Article + author bio + related posts	Out of Scope (WordPress)
14	Press Release / News	~360	Text article + financial tables	Out of Scope (Q4 Inc)
15	Confirmation / Thank-You	~12,000	Simple confirmation message	Single reusable template

3. Source AEM Component Inventory

38 distinct AEM components identified on the source site with 50+ modifier variants. These map to 21 EDS blocks.

38

Source AEM Components

50+

Component Variants

5

Component Categories

3.1 Layout & Content Components (17)

AEM COMPONENT	PURPOSE	VARIANTS	FREQUENCY
pageheadinghero	Full-width hero banner	m--dark, m--dark m--small-hero, --hasForegroundImage	Very High
textimage	Flexible text + image (most used)	m--teaser, m--teaser-no-border, m--teaser-full, m--one-third-img, m--title-over-img, m--text-overlay-dark, m--learning-center	Very High
text	Rich text content block	m--condensed	Very High
title	Section / page title	(standard)	Very High
image	Standalone image	(standard)	High
ctaitem	Call-to-action button/link	m--btn-primary, m--btn-secondary, m--btn-outline, m--btn-info, m--btn-white, m--btn-link, m--video, m--resource	Very High
ctalist	List/group of CTA buttons	(standard)	Medium
container	Layout container (grid columns)	m--match-height, m--no-gutters, m--border, container-fluid	Very High
sectioncontainer	Page section wrapper	m--indent-l1, m--well-blue-light, m--well-dark	Very High
separator	Visual divider / horizontal rule	(standard)	High
videoplayer	Embedded Brightcove video	(standard)	Medium
experiencefragment	Reusable content fragment	(standard)	Very High

AEM COMPONENT	PURPOSE	VARIANTS	FREQUENCY
sectiontitle	Section heading with anchor ID	(standard)	High
textoverlay	Text overlay on images	(standard)	Medium
testimonial	Customer quote/testimonial	(standard)	Low
anchorlist	In-page sticky anchor nav	(standard)	Medium
breadcrumb	Navigation breadcrumb trail	(standard)	Very High

3.2 Navigation Components (3)

AEM COMPONENT	PURPOSE	VARIANTS	FREQUENCY
manualnav	Manual sub-navigation sidebar	(standard)	High
autonavigation	Auto-generated child page nav	child variant	High
pragma-toggle-component	Toggle / expand-collapse for nav	(standard)	High

3.3 Form Components (8)

AEM COMPONENT	PURPOSE	VARIANTS
form-container	Form wrapper	(grid-based layout)
form-input	Text/email/tel fields	m--hideonload (conditional)
form-options	Dropdowns, checkboxes, radios	--drop-down, --checkbox, --radio
form-textarea	Multi-line text	(standard)
form-hidden	Hidden tracking fields	(standard)

AEM COMPONENT	PURPOSE	VARIANTS
form-button	Submit button	(standard)
form-recaptcha	Bot protection	(standard)
form-xfinclusion	XF in form (opt-in, tracking)	--MSD-Opt-in, --msd-mql, --msd-tracking-codes

3.4 Corporate / Custom Components (7)

AEM COMPONENT	PURPOSE	USED ON
about-hero	Custom About hero with video	About Us landing
leadership	Executive leadership grid	About Us
our-brands	Brand logo showcase	About Us, Brand pages
ourmission	Mission statement block	About Us
ceoletter	CEO letter/message	CSR pages
csr-commitment	CSR commitment statement	CSR pages
highlights	Key metrics/stats grid	CSR, About pages

3.5 Dynamic / Storefront Components (3)

AEM COMPONENT	PURPOSE	NOTES
kmd-card	Kameleon Design System product card	Data-driven, requires API
kmd-dm-card	Data-managed dynamic product card	Data-driven, requires API
kmd-dm-fbt	"Frequently Bought Together" widget	Data-driven, requires API

4. Target EDS Block Architecture

21 EDS blocks with 51 total variants required. Organized into 4 categories by function.

21

EDS Blocks

51

Total Variants

8

Core Blocks

7

Specialized Blocks

4.1 Core Content Blocks (8 blocks, 30 variants)

Hero Block — 6 variants

hero-promo

Full-width gradient + heading + paragraph + dual CTAs

hero-category

Dark background image, heading only (no CTA)

hero-banner

Mid-page promotional CTA with gradient overlay

hero-hub

Scientific imagery + heading + anchor nav + CTA

hero-minimal

Pure visual background, minimal text overlay

hero-event

Dark banner with event title, date, location

Cards Block — 10 variants

cards-product

Image + heading + paragraph + bullet links + CTA

cards-compact

Minimal 4-col: small image + heading + one-line

cards-workflow

Image-dominant: large dark images + heading

cards-resource

Standard 3-col: thumbnail + heading + description

cards-callout

Single promo card, dark background + CTA

cards-category

Text-only: linked heading + description, no images

cards-teaser

cards-icon

Image-top + title + desc + arrow CTA

Circular icon + title + arrow link (minimal)

cards-team

Portrait + name + job title + link

cards-brand

Logo + tagline + description + arrow link

Columns Block — 8 variants

columns-intro

Text left + promotional callout card right

columns-product

Asymmetric 7/5: rich text + stacked images

columns-event

Text content left + video embed right

columns-feature

Standard 2-col: text + image side-by-side

columns-diagnostic

Side-by-side (links, resources, image+text)

columns-mission

Text + SVG illustration for values

columns-leadership

Dark navy: portrait left + quote/bio right

columns-promo

Side-by-side promo banner cards + CTAs

Other Core Blocks

BLOCK	VARIANTS	DESCRIPTION
accordion	event, contact	Expandable content panels
embed	standard (Brightcove/YouTube), 3dtour (Kaon)	Video and 3D tour embeds
table	financial	Dense data tables
tabs	jumplinks	Sticky horizontal anchor navigation
fragment	standard	Reusable content fragment inclusion

4.2 Specialized Blocks (7 blocks, 14 variants)

BLOCK	VARIANTS	SOURCE COMPONENTS	COMPLEXITY
form	contact, lead-gen, survey	form-container + all form-* components	High
testimonial	quote, video-quote	testimonial	Low
highlights	stats-grid, key-metrics	highlights	Medium
text-overlay	dark-overlay	textoverlay	Low
cta-banner	primary, secondary	ctaitem (m--block), ctalist	Low
product-card	standard, dynamic, fbt	kmd-card, kmd-dm-card, kmd-dm-fbt	High
download	resource-download	ctaitem (m--resource)	Low

4.3 Navigation / Chrome Blocks (4 blocks, 5 variants)

BLOCK	VARIANTS	SOURCE COMPONENTS	COMPLEXITY
header	mega-nav	Global header / mega navigation	High
footer	standard	Global footer	Medium
sidebar-nav	manual, auto-taxonomy	manualnav, autonavigation	Medium
breadcrumb	standard	breadcrumb	Low

4.4 Template-Specific Blocks (2 blocks, 2 variants)

BLOCK	VARIANTS	PURPOSE	COMPLEXITY
cell-line-table	properties	Structured data for cell line database	Medium
step-list	protocol	Numbered protocol/procedure steps	Low

5. Template → Block Mapping

Which blocks and variants appear on each page template type.

TEMPLATE	HERO	CARDS	COLUMNS	ACCORDION	EMBED
Product Category Landing ~12,500 pages	promo banner	product compact workflow resource callout	intro	—	standard
Product Sub-Category ~20,000 pages	category	resource product	product	—	standard
Promotional Landing ~13,418 pages	promo	product teaser	feature promo	—	—
Event Page ~4,919 pages	event	—	event	event	standard
Learning Center ~2,300 pages	category	resource	product	—	standard
Technical Resource ~1,900 pages	category	resource	product	—	—
Protocol / Handbook ~1,030 pages	—	—	—	—	—
Virtual / 3D Tour ~1,337 pages	—	—	—	—	3dtour

TEMPLATE	HERO	CARDS	COLUMNS	ACCORDION	EMBED
Corporate (About) ~200 pages	minimal	team brand	mission leadership	—	—
Services Directory ~630 pages	minimal	category	promo	—	—
Cell Line Database ~620 pages	category	—	—	—	—
Brand Microsite ~530 pages	promo	product teaser	—	—	—

6. Design System & Content Patterns

Key Visual Patterns

- Cards-first design** — textimage teaser variants are the most-used component, mapping to 10+ card variants in EDS
- Hero + Sticky Anchor Nav + Sectioned Cards** — Standard product page pattern used by ~35,000 pages
- Section colored backgrounds** — Light blue "wells" and dark navy sections for visual rhythm
- Dual CTA pattern** — Primary (solid brand red) + Secondary (outline/link with right-arrow icon)
- Mondrian promotional tiles** — Side-by-side offer cards with background images + text overlay
- Left sidebar taxonomy nav** — Persistent on all product/category pages, auto-generated from page tree
- Dynamic product data cards** — Kameleon (kmd-*) cards powered by product catalog API

Third-Party Integrations

PLATFORM	USAGE	INTEGRATION TYPE
Brightcove	Video hosting (all video content site-wide)	Embed (player.js)
Kaon Interactive	3D product tours (virtual pages)	Full-screen iframe
Marketo	Form submissions and lead routing	Form action endpoints
Google reCAPTCHA	Bot protection on forms	JavaScript widget
Kameleon (kmd)	Dynamic product catalog cards	Client-side JS + API
Adobe Target	Personalization / A/B testing	AT.js
Adobe Analytics	Tracking	AppMeasurement / alloy.js

7. Development Effort Estimate

Project Effort Breakdown

Core Content Blocks (8 blocks, 30 variants)	18-22 days
Specialized Blocks (7 blocks, 14 variants)	10-14 days
Navigation / Chrome (4 blocks, 5 variants)	8-12 days
Template-Specific (2 blocks, 2 variants)	2-3 days
Page Templates & Content Models (15 templates)	5-7 days
Design Tokens & Global Styles	3-4 days
Dynamic Product Card Integration (kmd-*)	5-8 days
Third-Party Integrations (Brightcove, Kaon, reCAPTCHA)	3-5 days

Import Infrastructure (parsers, transformers)

8-12 days

Testing & QA (cross-browser, a11y, performance)

7-10 days

TOTAL PROJECT EFFORT

70-99 days

Team scaling note: With a 2-person development team working in parallel, the estimated calendar time is **35-50 days**. With a 3-person team, approximately **25-35 days**.

8. Migration Priority Recommendation

1

Foundation — Covers ~70% of Active Pages

~30-40 days | Product + Promotional + Services templates

- **Blocks:** hero (6 variants), cards (6 of 10), columns (4 of 8), tabs, sidebar-nav, breadcrumb, fragment, cta-banner
- **Templates:** Product Category Landing, Product Sub-Category/Topic, Promotional Landing, Services Directory
- **Global:** Header/mega-nav, footer, design tokens, global styles
- **Coverage:** ~46,000 pages enabled for migration

2

Expansion — Covers ~20% More

~20-30 days | Event + Learning + Technical + Brand templates

- **Blocks:** accordion (2), embed (2), cards (+4 remaining), columns (+4 remaining), form, download
- **Templates:** Event, Learning Center, Technical Resource, Brand Microsite

- **Coverage:** ~10,650 additional pages

3

Specialized — Remaining ~10%

~15-25 days | Corporate + Protocol + Virtual + Cell Line templates

- **Blocks:** testimonial, highlights, text-overlay, product-card (dynamic API), cell-line-table, step-list, table
- **Templates:** Corporate/About Us, Protocol/Handbook, Virtual/3D Tour, Cell Line Database
- **Coverage:** ~3,190 additional pages

Out of Scope

CONTENT TYPE	REASON	PAGES
Blog	Already migrated to WordPress platform	~643
Press Releases	Already migrated to Q4 Inc / newsroom	~1,574
Forms (global/forms/)	Decommissioned — all return 404	~18,763
Contact / Support	Redirects to React SPA	—
Thank-you pages	Trivial single template, migrate last if needed	~12,000

9. Risk Factors & Considerations

RISK	IMPACT	MITIGATION
Dynamic product cards (kmd-*) require API integration	High	Custom EDS block with fetch() to product catalog API; may need backend proxy
Kameleon Design System is proprietary	Medium	Reverse-engineer card rendering logic or negotiate API access documentation

RISK	IMPACT	MITIGATION
89K URLs includes significant dead content	Low	Pre-filter with HTTP status checks; focus on active pages only
Left sidebar nav is taxonomy-driven	Medium	Build auto-navigation block reading from EDS page index/query-index
Personalization (Adobe Target) content	Medium	Decide scope: drop personalization or implement EDS experimentation framework
Form submissions routed to Marketo	Medium	Map Marketo endpoint configuration for any active forms requiring migration
Brightcove video IDs may expire	Low	Verify video availability during content migration; flag broken embeds
Large page count (~61K) extends content migration timeline	High	Prioritize by traffic/business value; automate with import scripts per template

Key decision required: The dynamic product cards (kmd-*) appear on high-traffic product pages. These pull live product data from an API. The team needs to decide whether to (a) replicate the dynamic behavior with a custom EDS block + API, (b) pre-render static snapshots during import, or (c) exclude product catalog sections from migration scope.

Appendix: Pages Analyzed

Representative pages from each template type were analyzed during this assessment.

TEMPLATE TYPE	URL ANALYZED	STATUS	KEY FINDINGS
Product Category Landing	/life-science/pcr.html	Active	14 sections, 8 block variants, cards-dominant
Product Sub-Category	/life-science/pcr/real-time-pcr.html	Active	10 sections, 5 card variants, columns for detail

TEMPLATE TYPE	URL ANALYZED	STATUS	KEY FINDINGS
Event Page	/events/asms.html (ASMS 2026)	Active	8 sections, 3 accordions (25 items)
Clinical / Diagnostic	/clinical/diagnostic-testing.html	Active	7 sections, columns-dominant, colored wells
Electron Microscopy	/electron-microscopy/products.html	Active	11 sections, repeating columns-product
Corporate (About Us)	corporate.thermofisher.com/about.html	Active	4 sections, bespoke (mission, leadership)
Services Directory	/products-and-services/services.html	Active	5 sections, cards-category grid
Bioprocessing Hub	/life-science/bioproduction.html	Active	8 sections, teaser + icon card patterns
Virtual / 3D Tour	/virtual/1500-series-bsc-3d-tour.html	Active	Chromeless, single Kaon embed
Blog Post	thermofisher.com/blog/	WordPress	Separate platform, out of scope
Press Release	newsroom.thermofisher.com	Q4 Inc	Separate platform, out of scope
Forms / Contact	/store/v2/contact-us (redirect)	Decommissioned	All /global/forms/ URLs return 404
